SYNOPSIS

04/29/2009 - On Wednesday, April 29, 2009, (b) (6), (b) (7)(C), U.S. Environmental Protection Agency, Criminal Investigation Division Special Agent interviewed (b) (6), (b) (7)((b) (6), (b) (7)) is a Laborer for the Village of Crestwood.

DETAILS

On Wednesday, April 29, 2009, (b) (6), (b) (7)(C), U.S. Environmental Protection Agency, Criminal Investigation Division Special Agent interviewed (b) (6), (b) (7)((b) (6), (b) (7)) is a Laborer for the Village of Crestwood. I identified myself to (b) (6), (b) (7) and advised him that agents were at the Crestwood Department of Public Works facility to serve a Federal search warrant. (b) (6), (b) (7) was advised that he was speaking voluntarily and he was not in custody. (b) (6), (b) (7) was advised that he could terminate the interview at his discretion. (b) (6), (b) (7) provided the following information:

(b) (6), (b) (7) has been an employee with the Village of Crestwood since November of 2007. He reports for duty at the Department of Public Works building. He is given a hand written work assignment every morning by (b) (6), (b) (7). When asked about Consumer Confidence Reports (b) (6), (b) (7) explained he had no idea what the reports are and who maintains them.

(b) (6), (b) (7) explained that the only thing he knew about the water system is from his duty weekend. A duty weekend is described as an 8 am to noon shift on Saturday morning. During the duty weekend (b) (6), (b) (7) explained that he had to go to the pump house and take the readings. The readings are then recorded in a log book that is maintained in the pump house. (b) (6), (b) (7) does not know what the reading are and he states that there is no set procedure for what to do with the readings. The two tests taken are Chlorine and Chlorine Free.

He then measures the flow rates at the three meter heads. The flow of the three meter heads is also recorded on a log book that is maintained in the pump house. Again, he does not know what happens to this data and who maintains it. (b) (6), (b) (7)(C) was asked why he takes these readings and what does he do with the numbers? (b) (6), (b) (7)(C) advised that if the numbers are all out of whack he will call Scaccia or someone. (b) (6), (b) (7)(C) stated that he did not know what flow the pump was reading, but assumed they were to increase or decrease the flow from the city of Alsip.

(b) (6), (b) (7)(C) is not aware if the well is being operated. He has only been to the well house twice while employed at the Village of Crestwood. Once he went up there to turn on the heater so the pipes didn't freeze and the second time he was there to let the EPA sample in the building.

(b) (6), (b) (7)(C) is further identified as:

(b) (6), (b) (7)(C) (b) (6), (b) (7)(C)

(b) (6), (b) (7)(C)

Oak Forest, Illinois 60452

DOB: (b) (6), (b) (7)(C)

SSN: (b) (6), (b) (7)(C)

PHONE: (b) (6), (b) (7)(C)
